Course Description  
This course is designed to introduce students to the study of Turkish politics and foreign policy with a special perspective on relations with the United States. The course will be run simultaneously with a partner institution class from Sehir University in Istanbul. Students will get a chance to collaborate with peers from Turkey on several projects. The relations between the United States and Turkey have been historically strong especially during the height of the Cold War. There have been disagreements on policy between the countries over Cyprus, Iraq and the Kurds, Syria and Iran. Yet, both sides identify the alliance between the US and Turkey vital to their national interests. United States and Turkey have common interests under NATO, over EU issues, energy policy among others. The course will focus on creating a broad understanding of Turkish foreign policy and American foreign policy toward Turkey as well as develop understanding over specific issues of contention (Iraq, Iran, Syria, and Israel) and cooperation (EU, energy).

Course Objectives  
Students are expected to  
- familiarize themselves with Turkish politics and political system,  
- develop skills in reading foreign policy texts and identify the main argument,  
- build knowledge about the Turkey in relation to the Middle East, European Union and the United States.  
- to develop skills of cross cultural communication. The ability to communicate with people who may have a different perspective on issues is essential part of diplomacy. As students of political science and international relations, disagreeing without offending and also finding common grounds of understanding issues through compromise is an essential skill to develop.  
- to write argument driven papers and response papers about a specific foreign policy question.  
- to develop debate and discussion skills.

Course Requirements  
Attendance and Class Activities  
Students are required to attend class regularly and participate in other on-line assignments and activities in a timely fashion (unless excused in advance or there is proof of emergency). Do not come to class late. Be mindful that this class depends on student participation on line as well as in class. Due to time differences with Turkey, we need to be diligent about our responsiveness and responsibility toward the partner institution.  
During class time, if you walk in late, you are responsible for getting the instructor to mark you present after class. After the first late arrival, all other late arrivals will be counted as absences. 2 unexcused absences will lead to a 0 for attendance grade (a deduction of the full 15 % of the grade). Missing
scheduled on line meetings and discussions with partners in Turkey will also be treated as unexcused absences and will result in significant deduction of grade.

Participation is a large part of your grade in this course. If you come to all classes but do not participate in the discussion you will earn only 5 points out of 15. Come to class prepared to participate. This class is participation driven (again participation means on line as well as in class). The in class portion of the course will be run like a seminar where the students are expected to participate in discussions related readings rather than lectures. I would like our discussions to be focused on the relevant topic, but the expression of varying viewpoints is encouraged. Some of these discussions will cover issues upon which we may not all agree. While it is expected that you will develop your own views, it is important that everyone be willing to hear alternative viewpoints and that we treat one another with respect regardless of whether we agree or disagree.
